

HYDROGEN AND FUEL CELL VEHICLE PROGRAMS

Hydrogen Fueling Station

PARTNERS

STATION OPERATION

- Converts liquid hydrogen to gaseous hydrogen
- For hydrogen enriched natural gas buses
 - Provides hydrogen natural gas mixture at 3600 psi
 - Fuels bus in 5-10 minutes
- For hydrogen fuel cell vehicles
 - Provides pure hydrogen at 5000 psi

KEY CHARACTERISTICS

- Supports hydrogen infrastructure research
- Northern California's third station
- Highest expected fuel usage for transportation in the West
